

PX-5700 SERIES 03 & 05 Type

Hospitality

FOR

Retail

With bright and clear LCD & drop-in thermal printer(s), PX-5700 series offer usability and functionality for both Retail and Hospitality industries. Solutions even competing with high-end machines are compressed in its compact & stylish cabinet.

PX-5700/5750 05 type for Retail industries

Discount is essential and important for retail store, which is fully supported by Complete Quantity Discount table and Coupon function. Scanning function is enforced with Barcode print function and compatibility with price/weight embedded barcodes with scale connection. Advanced memory function offers Amount Tracking as standard, optional Customer File with name/address/etc. and ESF (Electronic Store & Forward, electronic journal data) and max. 56,076 PLU files.

PX-5700/5750 03 type for hospitality industries

With flat keyboard of 152 key positions plus 3 level menus and Look Up PLUs key which enables quick access to a PLU among sorted groups of PLUs, hundreds or thousands of items can be picked up quickly and easily from the keyboard. Table system and Clerk Interrupt system help multiple clerks to handle multiple customers' transactions at the same time. In IRC (Inter Register Communication) network, tables/tracks with item details are available on any terminal. Optional ESF (Electronic Store & Forward) memory offers journal data analysis on PC and printing journal on receipt printer at the end of the day (PX-5750). Optional iButton (Dallas key) facilitates fast and easy clerk sign-on/off.
