

The difference...

LX-5700/5750

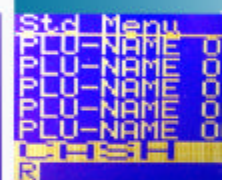

Difference between LX-5700/5750 and LX-5600

Unlike LX-5600 series, the high-speed internal thermal printer is employed for LX-5700/5750 with Clamshell mechanism that simplifies the paper-loading process to the minimum. The steps are pretty much easy, open the cover, place the paper roll inside and close the cover. It's that simple! This will definitely change the way of doing business! Moreover, it issues receipts amazingly quickly and silently!

- ✓ Thermal printer enables Graphic logo printed on receipt.
- ✓ Auto Cutter makes Ticketing function available.
- ✓ Optional ESF (Electronic Stored & Forward) memory makes you do away with journal and realizes paper saving (LX-5750).
- ✓ Full 22 digit PLU descriptor can be printed in one line with its price because of 36-column width on 58 mm paper.

LX-5750

LX-5700

<Printer Specification>

Printer Type: Thermal printer with an auto cutter and clamshell mechanism

<Model>	<Sheet>	<Speed/Sec>	<Printing Digit>	<Paper Roll>
